An adventure-story about self-discovery, *The Journey that’s Ours* introduces young readers to their unique individuality and promotes growth in self-confidence.

In such a fast changing environment with exposure to so much more, tools such as mind-mapping, conflict resolution, and how the law of attraction really works, are needed to help us keep up while staying true to ourselves.

Continuing with their adventures, teenage siblings Joel and Jina once again meet “Magic” who guides them through the fun and testing elements of their everyday lives. Jina falls in love and gets hurt, while Joel has to deal with the pains of standing up both on his surfboard and as a young man.

An interactive book with a “Personal Development” section, *The Journey that’s Ours* can simply be read as a story or used as a fun introduction to a world of endless possibilities.
